- The graphics below illustrate self-rating on the skills based on literacy and interest I have discovered at the current moment.

INTERESTS

- Deploy networking and telecommunication equipment
- Reading documentation and research networking or telecommunication products
- Website development
- Provide technical support related to networking and telecommunication voluntarily for non-profit and personal purposes
- Travel and Food photography

ACHIVEMENTS / PROJECTS

1. MOA Project
 - I was involved in project planning, test execution and test management of MOA, which is one of the product offered by Standard Chattered. It is a type of loan that you can use your deposits to offset your mortgage loan. I conduct SIT testing and coordinate UAT test execution with Central test team and business users. Gather feedback and all defects raised to get appropriate teams to fixed them.
2. Uni Final Year Project: Denial of Service Mitigation using NAT Load Balancing also known as TCP Load Distribution
 - A network deployment and setup which able to mitigate DOS attack by using multiple servers and a standard router without the use of expensive load balancing equipment.
